About TE Connectivity

TE Connectivity is a leader in engineering groundbreaking technological innovations that are making possible the world's most advanced technologies.

TE Connectivity empowers engineers for innovation in industrial technology – by designing and manufacturing sensor and connectivity solutions for the technology that is enabling a safer, sustainable, productive, and connected world. As the go-to engineering partner for today's innovation leaders and technology entrepreneurs, we are helping solve tomorrow's toughest challenges. Our electrical and electronic products are engineered to reliably connect and protect the flow of data, power, and signal – in electric vehicles and aircraft, digital factories and smart homes, and life-saving medical devices, efficient utility networks, and the global communications infrastructure.

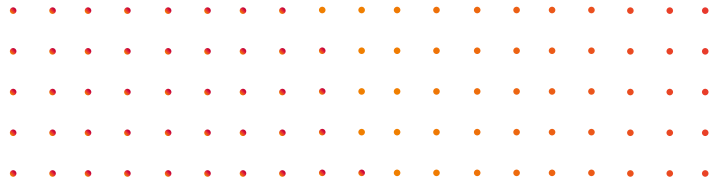

As a global electronics company with 80 years of experience in developing innovative solutions for complex industrial technology applications used in harsh environments, our broad and diverse team of industry experts includes electrical and mechanical engineers who focus on designing electronic components and electrical components manufactured for reliability, safety, and sustainability, offering technological solutions that help empower the potential of people to drive innovation in the technologies transforming how people live, work, and connect.

What You'll Do

At TE Connectivity (TE), you will unleash your potential working with people from diverse backgrounds and industries to create a safer, sustainable, productive and more connected world.

The successful candidate will join TE Connectivity's Global Government Affairs Team in Brussels and support the shaping of EMEA policies through strategic partnerships with government and industry groups aligning with business objectives. The Senior manager serves as company liaison and interact with EU and national government officials to advance the company priorities. They prepare policy briefings, policy analysis, provide guidance, recommendations to the business and drive active company participation in government forums and industry groups to advance TE business in the areas of automotive, energy, industrial, aerospace amongst others.

Tasks and Responsibilities

Joining a global team of Government and Public Affairs management professionals, you will aim at being a business enabler in supporting TE Connectivity internal customers in strategic European, Middle East and African countries with a focus on Germany and Central & Eastern policy initiatives to help deliver on TE business growth objectives in the region.

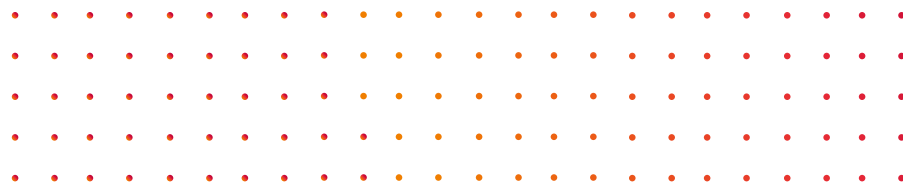

You will support TE Connectivity's Sr. Director Government Affairs EMEA & Global Corporate Responsibility team to help achieve TE's strategic objectives aligned with TE's regional business leaders and corporate-led functions so to deliver value to the business.

Your areas of responsibility will include:

- Analyzing policies affecting all Business Units, segment and affecting TE bottom lines
- Proactively Identifying policy initiatives, regulatory trends and emerging policy risks and support business leaders, operations executives, product management, supply chain, etc., with timely guidance and operationalized mitigation / implementation plans.
- Supporting the translation and monetizing policy trends into business opportunities (electrification, mobility, etc.)
- Supporting, shaping and implementing public policy advocacy plans to advance TE's agenda with decision-makers both at EU and national levels - be a business enabler to deliver strategic policy recommendations to the business related to industrial policies, manufacturing, geopolitics, defence, cyber, energy, trade, ESG and sustainability related policies.
- Engaging with Government stakeholders in key markets TE Connectivity serves (Central & Eastern European, Germany and North Africa) and continue building TE credentials in support of the company's business.
- Supporting strategic corporate responsibility programs and communities' engagement.

Skills, knowledge, experience and key attributes:

- Solid track record with 8-10 years of professional experience in government affairs and public policies in a company, consultancy or trade association.
- University / Master degree preferably in European studies, law, business administration, public administration or politics with strong analytical skills and operational capabilities.
- Excellent communications skills in English (written, oral) and German (written, oral) a must. Other EU languages a plus.
- Excellent policies analytical skills.
- Ability to master business and industrial environment dynamics.
- Experience in technology / industrial manufacturing sectors.
- Excellent understanding of EU and Member States decision-making process, and regulatory environments with experience in navigating / engaging with external stakeholders, governments and policymakers, as well as internal stakeholders.
- Good understanding of geopolitics, EU industrial policy priorities, and implementation processes.
- Experience in working in a multi-cultural and complex cross-functional environments and ability to build relations, be collaborative and to deliver creative and operationalized solutions and be a trusted partner to EU policymakers.
- Professional with strong sense of integrity, values and ethics.
- Readiness to 20% travels across the region, and occasional intercontinental travels.
